$\qquad$

## QUIZ - STATIONARY POINTS AND FUNCTION ANALYSIS

1. ( $10 \%$ ) In a stationary point the value of the derivative is $\qquad$
2. ( $10 \%$ ) If the value of the derivative is 0 at a point then the point must be a minimum or a maximum. True / False. Explain!
3. $(5 \%)$ If $f^{\prime}(a)<0$, that means that the function is $\qquad$ at a.
4. $(5 \%)$ If $f^{\prime}(a)=0$, that means that the function has $\qquad$ at a.
5. (24\%) Given the following function:

Fill the table with: Positive, negative, zero, doesn't exist:

|  | $\mathrm{x}=\mathrm{a}$ | $\mathrm{x}=\mathrm{b}$ | $\mathrm{x}=\mathrm{c}$ | $\mathrm{x}=\mathrm{g}$ | $\mathrm{x}=\mathrm{d}$ | $\mathrm{x}=\mathrm{e}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{f}(\mathrm{x})$ |  |  |  |  |  |  |
| $\mathrm{f}^{\prime}(\mathrm{x})$ |  |  |  |  |  |  |

6. $(46 \%)$ Given the function: $f(x)=\frac{3}{x-1}-x^{2}$
a. $(5 \%)$ Sketch the graph for $-5 \leq x \leq 5$ and $-15 \leq y \leq 15$

b. (5\%) Find: $f(2)=$
c. $(10 \%)$ Write down the coordinates of the local maximum on the graph of $f$
d. $(5 \%)$ Find the gradient of the tangent to the graph at $x=2$.
e. $(15 \%)$ There is at least one more point on the graph in which the tangent has the same gradient as in $x=2$. Find such a point.
f. $(6 \%)$ Where is the function increasing?
